LoCTA and eTrail Integration

As many of you are aware, MAG:NET Solutions has now integrated the LoCTA product with Equifax's eTrail system. eTrail is a powerful online information system designed specifically for the public sector, offering online access to an extensive consumer database from one of the UK's leading credit reference agencies.

The new facility will combine the online and immediate access results of LoCTA with address verification data from the eTrail system, providing an all in one package that offers extensive facilities and enhanced data sources to help improve tracing and verification of debtors.

The eTrail information will be available in two levels. Firstly an enhanced ID report with full address verification and secondly a more comprehensive report containing detailed financial information.

The interface has been designed with the specific aim of providing a service that facilitates an effective, secure, Government Connect (GCSx) approved interconnection between Local Authorities, making LoCTA a truly integrated tracing solution that delivers a rapid return on investment.

If you require further information or would like to arrange a demonstration please do not hesitate to contact us.

MAG:NET Solutions are now CoCo Approved

After months of planning, MAG:NET Solutions has received CoCo approval as part of the Government Connect initiative. As the First third party to receive full approval, it is a significant achievement for all departments involved.

All protocols used by LoCTA and MAG:NET Solutions Ltd have been fully approved for use within the Government connect environment, including the new Equifax link.

Following this approval, the implementation of MAG:NET's GSE connection has been completed and the LoCTA infrastructure will be fully operational on the Government network during October. If you have any questions please contact the technical support team on the number listed below.

Success in Scotland

"LoCTA product provides the Moray Council's recovery team with an easy to use tool to locate debtors who have moved away without leaving a forwarding address. It represents a simple method to access the information held by most British councils and also promotes communication between council. This maximizes our opportunity to locate absent debtors and thereby minimize any potential loss of income to the council."

James Taylor, Taxation Manager, Moray Council
